WHO CAN ATTEND

Educators who have attended Level 1 workshop and have a firm understanding and practical experience with using the Compass Education tools and Systems Thinking in their classroom.

LEARNING OUTCOMES

Participants will understand:

- Theory of change
- The current systems structures of the world
- The influence and power of mental models, and how they can be transformed
- The synergy of mental models and systems structures to produce behavior
- Systems thinking as key to the paradigm shift in education

Participants will be able to:

- Identify sphere of influence and sphere of concern
- Identify and utilize leverage points for sustainable change
- Use Systems Thinking tools to develop an action plan for change
- Lead change for education for a sustainable future in their school
